SEPTEMBER 3, 1937.

Section 3 of the Act of September 1, 1937 (Public No. 411—75th Congress—First Session), entitled "AN ACT Au-

<sup>1</sup> 2 F. R. 619 (DI).

thorizing the conservation, production, exploitation, and sale of helium gas, a mineral resource pertaining to the national defense and to the development of commercial aeronautics, authorizing the acquisition, by purchase or otherwise, by the United States of properties for the production of helium gas, and for other purposes", provides in part as follows:

(b) That helium not needed for Government use may be produced and sold upon payment in advance in quantities and under regulations approved by the President, for medical, scientific, and commercial use, except that helium may be sold for the inflation of only such airships as operate in or between the United States and its Territories and possessions, or between the United States or its territories and possessions and foreign countries: *Provided*, That no helium shall be sold for the inflation of any airship operating between two foreign countries notwithstanding such airship may also touch at some point in the United States: \* \* \*

Section 4 of the Act provides as follows:

Sec. 4. No helium gas shall be exported from the United States, or from its Territories and possessions, until after application has been made to the Secretary of State, and a license authorizing said exportation has been obtained from him on the joint recommendation of all of the members of the National Munitions Control Board and the Secretary of the Interior: *Provided*, That, under regulations governing exportation of helium approved by the National Munitions Control Board and the Secretary of the Interior, export shipments of quantities of helium that are not of military importance as defined in said regulations, and which do not exceed a maximum to be specified therein, may be made under license granted by the Secretary of State without such specific recommendation. Such regulations shall not permit accumulations of helium in quantities of military importance in any foreign country, nor the exportation of helium to countries named in proclamations of the President issued pursuant to section 1 (a) or (c) of the Neutrality Act of May 1, 1937 (Public Resolution Numbered 27 of the Seventy-fifth Congress) while such proclamations are in effect, and shall require exporters to submit a sworn statement to the Secretary of State showing the quantity, destination, consignee, and intended use of each proposed exportation.

Any person violating any of the provisions of this section or of the regulations made pursuant hereto, shall be guilty of a misdemeanor and shall be punished by a fine of not more than \$5,000 or by imprisonment for not more than one year, or by both such fine and imprisonment; and the Federal courts of the United States are hereby granted jurisdiction to try and determine all questions arising under this section.

The National Munitions Control Board shall include in its Annual Report to the Congress full information concerning the licenses issued hereunder, together with such information and data collected by the Board as may be considered of value in the determination of questions related to the exportation of helium gas.

Under the authority of the aforementioned provisions of law and in pursuance thereof, the Secretary of State hereby prescribes and promulgates, with the approval of the National Munitions Control Board and the Secretary of the Interior, the following regulations governing the export of helium gas:

(1) Wherever the word helium is used in these regulations, it shall be understood to mean "contained helium" at standard atmospheric pressure (14.7 pounds per square inch) and 70° Fahrenheit. (3) Licenses authorizing export shipments of helium gas for medical, scientific, and commercial use other than aeronautical operations will be issued by the Secretary of State for quantities not to exceed, during any one year, to one ultimate consignee or purchaser, 20,000 cubic feet, and not exceeding, during any one year, to the consignees or purchasers within any one country, 500,000 cubic feet. Applications for license to export helium gas in excess of the quantities stated herein, for purposes other than aeronautical operations, will not be granted by the Secretary of State without the unanimous recommendation of the members of the National Munitions Control Board and the Secretary of the Interior.

(4) All applications for license to export helium gas shall be accompanied by evidence to show that reasonable safeguards have been adopted to insure that there shall be no unnecessary waste of the helium gas desired.

(5) Succeeding applications for license to export helium gas shall be accompanied by information indicating the manner of disposal of the helium gas obtained under licenses preceding that applied for.

(6) Licenses authorizing the exportation of helium gas for use in commercial or scientific aircraft operations and in quantities considered by the National Munitions Control Board and the Secretary of the Interior not to be of military importance will be issued by the Secretary of State under allotments to exporters which, on the joint recommendation of the Board and the Secretary of the Interior, will be granted for a period of not to exceed one year.

(7) Requests for allotments under paragraph (6) hereof shall be submitted to the Secretary of State in the form of an affidavit, subscribed and sworn to before a notary public. Such requests shall identify and describe the aircraft for use in which the helium gas is intended and shall include, for the consideration of the National Munitions Control Board and the Secretary of the Interior, full information in regard to the proposed schedule of operations of the aircraft for the period to which the allotments are to apply. Requests for allotments shall also be accompanied by evidence showing that reasonable safeguards have been adopted to insure that there shall be no unnecessary waste of the helium gas desired and evidence to rebut the presumption that the quantity stated therein should be considered of military importance. An estimate of the rate at which the helium gas is to be exported shall be included in all requests for allotments.

(8) Succeeding requests for allotments under paragraphs (6) and (7) hereof shall indicate the manner of disposal of the helium gas obtained under the allotment preceding that requested.

(9) Applications for license to export helium gas under allotments in accordance with the provisions of paragraphs (6) and (7) hereof shall be made to the Secretary of State and shall include information which will adequately identify the aircraft for use in which the helium gas is intended. Such identification shall be the same as that used in the request for the allotment under which application is being made.

(10) Helium gas leaving the United States when used for or intended for the inflation of an aircraft will not be considered as exported within the meaning of Section 4 of the Act when it is the intention of the owner of the aircraft that it shall remain under American registry and shall be commanded by a duly certified United States airman during the entire period of its sojourn abroad, and when there is no intention on the part of the owner of the aircraft to dispose of the helium gas in any foreign country.

(11) The shipper's export declaration (Customs form 7525) or such other document as the Bureau of Customs may require must contain the same information in regard to the quantity and value of the helium gas as that which appears on the application for license.

(12) Export licenses and export declarations, or other documents required by the Bureau of Customs, concerning helium gas must be filed with the appropriate collector of customs at least 24 hours before the proposed departure of the shipment from the United States, and, in the case of a shipment by a seagoing vessel, 24 hours before the lading of the helium gas.
